

Roadmap and current state

Separating implemented work, launch preparation and undated concepts.

PRE-LAUNCH • screenshots use sample data

Prepared: 25 September 2026

State	Scope	Caveat
Implemented	Image generation, makeup try-on, product/ad copy, bulk wording scan, custom models and quota screen.	Found in code; not proof of public availability.
Launch preparation	Resubmission to the Shopify App Store.	Approval and date are not promised.
Concepts, undated	On-skin/mirror cosmetics imagery, scheduled scans and stronger model-fit checks, among other ideas.	Scope, priority and price are undecided.

What to decide now

Do not commit a rollout based on planned features. At launch, confirm installation, features, pricing and terms on the official page; test one complete product workflow.

Product direction

Mumu Labo aims to reduce fragmentation among imagery, copy and wording review. The immediate priority is a reviewable path from generated candidates to Shopify application. Concepts below are not commitments.

AI 商品撮影

商品画像から日本人モデル着用写真を自動生成。Shopify商品に直接保存。
