

How the workflow fits together

From source product data through creation, human review and Shopify application.

PRE-LAUNCH • screenshots use sample data

Prepared: 25 September 2026

01 Select a product

Start with Shopify imagery, description and category

02 Create candidates

Photos, product/ad copy and makeup try-on

03 Scan wording

Find issues and suggested edits in bulk

04 Human approval

Check color, patterns, logos, facts, law and policies

05 Apply in Shopify

Save selected images/copy; inspect the product page

Where automation stops

Generation and scanning produce candidates for review. The merchant decides what to apply or publish and verifies compliance and fidelity. Automatic rollback and scheduled scans are not current features.

1. 商品を選ぶ

撮影用サンプル商品 変更

2. カテゴリ・トーン・追加情報

商品カテゴリ

☒ アパレル
☐ 化粧品
☐ 健康食品・サプリ
☐ 食品・飲料
☐ ジュエリー・アクセサリー
☐ その他

トーン

☒ カジュアル・親しみやすい
☐ 高級感・プレミアム
☐ ミニマル・シンプル
☐ ポップ・元気
☐ 専門性・信頼感

ターゲット顧客 (任意)

訴求したい特徴・ベネフィット (任意)

3. 生成・裏機法チェック・保存

コピーを生成

Example copy configuration (sample UI).

Inputs and approval responsibilities

Stage	App assists	Merchant confirms
Input	Uses selected product and settings.	Accuracy of source imagery and data.
Candidate	Offers images, copy and findings.	Facts, color, rights and claims.
Apply	Saves selected content in Shopify.	Destination, storefront display and edits.

Sources and verification

Features and UI: current Palette Studio source (shopify-apparel-ai, checked 25 Sep 2026). Pricing and launch status: official landing page and current plan definitions. Screenshots show the Japanese UI with sample data in an isolated preview, not proof of live-store operation or production saving.
